True Story!

The Journey Starts Now... Don't Forget Your Map!

The chilling story of how my two teenage sons survive in the mountains on their trip to Yosemite National Park. Lost overnight in the wilderness near Half Dome on April Fool's Day ... this is their story. A story of having a plan go wrong ... of making a new plan to save their lives.

Bad things do happen to good people, but it is how we deal with obstacles that makes the difference. Using good judgment and reason, defining the goals that must be achieved, moving forward with a positive mental attitude can lead to success.

Overcoming adversity is a must at school or in the wilderness.
